

01 51 33 – Temporary Telecommunications

1. General

- A. Arrangements for telephone service shall be made by the Contractor with the local telephone company. The Contractor will pay the installation charges and will pay local and long-distance charges.
- B. Utilities and services shall not be interrupted without the Owner's approval as to time and duration. No utilities and services serving existing facilities shall be discontinued until the new service connections are installed unless temporary connections are installed to serve the existing facilities. Owner's representative must be present at all service interruptions.
- C. This specification section can be rewritten due to specific or extraordinary field conditions.
