

07 19 00 – Water Repellants

1. General

- A. The use of water-repellent masonry coatings is discouraged because they must be continually renewed. Due to their temporary nature, they should not be used except in special situations.
- B. If water repellents are needed, they must be compatible with the surrounding surfaces or roofing materials so as not to damage them while recoating.

2. Application

- A. Sandblasting of masonry is prohibited.
