

11 12 00 – Parking Control Equipment

1. General

- A. The Owner currently contracts with parking control vendors to supply this equipment. The Contractor shall supply conduit and wiring to the site of the equipment and the Owner will be responsible for the installation and final connection. The Owner shall supply equipment drawings and electrical requirements to the Consultant for reference. Provision will be made for Card Reader equipment to be set in a 3/4 inch conduit to run from the stand to the gate box. Where necessary, provisions shall be made to enable persons with disabilities to activate, enter and egress lots and garages without the need to manually swipe card.
- B. See Appendix **A111200** for additional information.
