

11 21 23 – Vending Equipment

1. General

- A. If vending equipment is to be provided, coordination with the Duke Vending Services is necessary. Vending equipment shall be provided by the Owner; however, the design of the vending area shall consider placement of outlets, drainage, visual placement of the units, accessibility to the units, floor texture at area of machines (vinyl flooring or nonskid hard surfacing is recommended) and adequate lighting. The Consultant also will coordinate with the Duke Card Office to place Duke Card reader wiring in vending areas.
- B. All operable mechanisms shall meet the ADA Standards.
